

RARE FELLOWSHIP PROGRAM

A **RARE** fellowship at the **HUB** of the Specialty Pharmacy Network

What is a Pharmacy HUB?

Pharmacy HUB - The center of a specialty pharmacy network; provider of comprehensive commercialization and patient support programs, including case management, co-pay, coupon & financial assistance programs, reimbursement support, nursing support, healthcare professional education, patient adherence & education support, non-commercial pharmacy dispensing, and data analysis.

HUBs provide a unique opportunity for fellows to interact with many industry stakeholders, including biopharma manufacturers, pharmacies, payers, data aggregators, and more, while engaging in projects surrounding patient care, data management, and drug launch support.

About RareMed

RareMed is the nation's only pharmacy HUB focused entirely on complex and rare conditions. Headquartered in a brand-new, state-of-the-art facility in Pittsburgh, PA, RareMed transforms the lives of patients afflicted with rare and devastating conditions by accelerating access to biomedical breakthroughs with the nation's highest-ranked patient satisfaction.

RareMed's RareSupport® teams provide dedicated, comprehensive commercialization and patient care services to biopharma clients around the country. RareMed's RarePath™ software systems assist manufacturers with managing and analyzing network data. RareMed's onsite non-commercial pharmacy is licensed to dispense in all 50 states and DC.

Lauded as the fastest-growing healthcare company and the most innovative company in the region by Pittsburgh Business Times, and led by EY Entrepreneur of the Year Dr. Gordon Vanscoy, RareMed has been voted a Pittsburgh Post-Gazette Top Workplace and a Pittsburgh Business Times Best Place to Work for three years running.

Experience Overview

The RareMed Fellowship Program offers unique opportunities to engage key stakeholders in the development and management of new and existing patient support programs. During the one-year program, Fellows will develop clinical and business skills through internal and external experiences built around RareMed's concierge approach to pharmacy HUB services. The Fellow will become well acquainted with rare disease medications and associated support programs through a variety of rotational and longitudinal experiences in areas such as Pharmacy Services, Business Operations, Client Services, Implementation, Business Development, Technology, and Analytics. Upon completion of the Fellowship, the candidate will be well versed in the key components of patient support programs and the impact and importance they have on rare disease patients.

Unique Program Features

- Understand the intricacies of pharmacy HUBs, specialty pharmacy networks, and complex patient therapies
- Work with senior leadership and gain exposure to industry leaders
- Execute projects and enhancements for new and existing clients
- Engage with colleagues through professional development presentations and company culture meetings
- Gain first-hand experience launching and commercializing rare disease products
- Explore the role of business development, finance, marketing, technology, and project management in the industry

Goals

- Understand the role of the patient support program and the relationship with the many stakeholders in the treatment network, including specialty pharmacies, manufacturer, and data aggregator
- Experience unique patient and healthcare provider journeys based on network distribution models, product support, disease states, patient populations and biopharma partner expectations
- Interact with prescribers, patients, and partners to optimize the unique and complex care associated with rare disease patients
- Learn regulatory standards, compliance, reporting and auditing as they relate to specialty pharmacies and patient support programs
- Understand the role of a non-commercial pharmacy in supporting patient assistance programs and various free drug programs
- Participate in the development of new internal processes and enhancements of current workflows
- Contribute to program enhancements with biopharma partners
- Actively participate in the handling of specialty medications from prescription intake through dispense
- Lead and complete a focused research project and/or white paper
